About us

"Krutanic Solutions is at the forefront of transforming education through cutting-edge technology. Our comprehensive platform empowers learners with personalized learning experiences, collaborative tools, and real-time analytics. With adaptive assessments and interactive content creation, we enhance student engagement and achievement. Join us in revolutionizing education for the digital age, driving positive outcomes and preparing learners for success in tomorrow's world."

Why Business Analytics?

- Business analytics is crucial for data-driven decisions, making skilled professionals essential across industries for strategic growth.
- Business analysts enjoy competitive pay, with high earning potential in roles like data scientist or analytics manager.
- Opportunities span finance, healthcare, marketing, and tech, allowing you to apply analytical skills across various sectors.
- Business analytics offers international roles, with companies worldwide seeking data-savvy professionals for global market insights.
- You'll work on cutting-edge technologies like AI, machine learning, and big data, driving business transformation.
- As data continues to shape decision-making, the demand for business analysts ensures long-term career stability and growth.

ST 1 MONTH

Live sessions with industrial experts having experience above 10 years in the industry.

Recordings of all live sessions available with lifelong access in our LMS portal.

Industry related curriculum designed by the professional working in the top hierarchy.

2 MONTH

Two real time industrial projects:One minor project and One major project.

All mentors will be assigned as project leads and guide the intern till the completion of the project.

Additional projects for personal development can be required.

Curriculum included

MODULE - 01

Introduction to Business
Analytics Overview of
business analytics and its
importance in decision—
making Types of analytics:
descriptive, predictive,
prescriptive Introduction to
Python programming
language and libraries
(NumPy, Pandas,
Matplotlib).

MODULE - 02

Data Exploration and
Visualization Data
preprocessing techniques:
cleaning, transformation,
handling missing values
Exploratory data analysis
(EDA) techniques Data
visualization using
Matplotlib and Seaborn.

MODULE - 03

Descriptive Analytics
Measures of central
tendency and dispersion
Data summarization
techniques: mean, median,
mode, variance, standard
deviation Introduction to
probability distributions
and inferential statistics.

MODULE - 04

Predictive Analytics Regression, Linear
regression: theory and
implementation,
Multiple linear
regression Model
evaluation metrics: Rsquared, adjusted Rsquared, RMSE, MAE.

Curriculum included

MODULE - 05

Predictive Analytics –
Classification, Logistic
regression: theory and
implementation, Decision trees
and ensemble methods
(Random Forest, Gradient
Boosting), Model evaluation
metrics: confusion matrix, ROC
curve, precision, recall, F1–
score.

MODULE - 06

Time Series Analysis
Introduction to time series
data, Time series
decomposition Forecasting
techniques: moving
averages, exponential
smoothing, ARIMA
(AutoRegressive, Integrated
Moving Average).

MODULE - 07

Prescriptive Analytics
Introduction to prescriptive
analytics Optimization
techniques: linear
programming, integer
programming Introduction
to decision trees and
decision analysis.

MODULE - 08

Application of Business
Analytics Case studies and real-world applications of business analytics in various industries (e.g., retail, finance, healthcare) Group projects: students work on a real-world business problem applying the concepts learned throughout the course.
